Letter dated 1 June 2001 from the Executive Chairman of the United Nations Monitoring, Verification and Inspection Commission addressed to the President of the Security Council

In paragraph 19 of its resolution 1330 (2000), the Security Council reiterated its request in paragraph 8 of resolution 1284 (1999) to the Executive Chairman of the United Nations Monitoring, Verification and Inspection Commission (UNMOVIC) and to the Director General of the International Atomic Energy Agency to complete by the end of this period the revision and updating of the lists of items and technology to which the import/export mechanism approved by resolution 1051 (1996) applies.

Paragraph 26 of the Special Commission's plan for ongoing monitoring and verification (S/22871/Rev.1), approved by the Security Council in its resolution 715 (1991), provides that the Special Commission could, after informing the Security Council, update and revise the annexes in the light of information and experience gained in the course of the implementation of resolution 687 (1991) and 707 (1991) and of the plan.

In paragraph 9 of its resolution 1051 (1996), the Security Council provides that the lists may be amended in accordance with the plans, after appropriate consultations with interested States and, as laid down in the plans, after notification to the Council.

In accordance with the above requirements, UNMOVIC held a series of consultations with interested States. Consultations on the lists of chemical and biological items took place on 13 and 14 February and 8 and 9 May 2001. Consultations on the missile-related list took place on 25 April 2001.

For the purposes of the notification to the Security Council, as provided in its resolution 1051 (1996), I am transmitting herewith the revised lists of chemical-, biological- and missile-related items subject to notification under the resolution (see annex).

I would be most grateful if you would bring the present letter, together with the revised lists, to the attention of the members of the Council.

Items to be notified under the Export / Import Mechanism approved by SCR1051

Provisions related to Chemical Items

1. The following list (List A) contains chemicals capable of being used for the development, production or acquisition of chemical weapons, but which also are usable for purposes not prohibited by resolution 687 (1991) and, therefore, are subject to notification under the Export/Import monitoring mechanism for Iraq approved by Security Council resolution 1051 (1996). For the purposes of this annex the chemicals listed include their chemical forms and mixtures.

2.2 (Commodity Designator Code: BA002200)

Biological safety cabinets, which allow manual operations to be performed within, whilst providing an equivalent to Class I, II or III biological protection, as specified in the WHO Laboratory Biosafety Manual (Geneva, 1993) as follows:

Class I cabinet: an open-fronted, ventilated cabinet for personal protection with an unrecirculated inward air flow away from the operator. It is fitted with a HEPA filter to protect the environment from a discharge of microorganisms;

Class II cabinet: an open-fronted, ventilated cabinet for personal, product and environmental protection, which provides an inward air flow and HEPA-filtered supply and exhaust air. There are two main variations: the Class IIA type recirculates 70 percent of the air; the Class IIB type recirculates 30 percent of the air; and
